

Signature School Acceptable Use Policy

2026-2027

POLICY CONCERNING USE OF ONLINE SERVICES, NETWORK, AND DEVICES AND DISCLAIMER

Internet access, school network access, and school device access are available to students and teachers at Signature School. The goal of providing these school resources is to promote educational excellence by facilitating resource sharing, innovation, and communication. Moreover, electronic information research skills are now fundamental to the preparation of informed citizens and future employees. This policy attempts to strike a balance among the educational resources of the Internet, the potentially illegal and offensive elements of the Internet, and the legal rights of students using the Internet.

Access to the Internet allows students to explore thousands of libraries, databases, bulletin boards, and other resources while exchanging messages with people throughout the world. Unfortunately, however, some of the Internet sites may contain information that is illegal, defamatory, inaccurate, abusive, sexually-oriented, or otherwise offensive, and certain goods and services can be purchased through the Internet which could result in unwanted financial obligations for which a student's parent or guardian would be liable.

Students are prohibited from using cellular telephones, gaming devices and smartwatches during the school day - from the first bell to the last bell - while on school property. This prohibition is subject to exclusions provided by law including, without limitation, use during a school emergency as determined by the Executive Director or their designee.

Signature School expects that the faculty will blend thoughtful use of the Internet and digital devices throughout the curriculum and will provide guidance and instruction to students in their use, so as to minimize non-educational uses of the Internet. The students will have been provided with guidelines and lists of resources suited to Signature School's educational mission, goals, and objectives. This, and enforcement of the attached "Rules of Online Network Etiquette" and "List of Prohibited Uses," will minimize inappropriate uses.

The smooth operation of the Internet, the school network, and devices relies upon the proper conduct of all end users who must adhere to certain guidelines to ensure efficient, ethical, and legal utilization of these resources. The Signature School "Acceptable Use Policy" incorporates these guidelines and sets forth certain behavior that will result in the loss of use of Internet and/or network access and/or device privileges and possibly other disciplinary action. Law enforcement agencies may be involved.

To remain eligible as users, students' use of the Internet, the school network, and other school provided devices must be in support of and consistent with the educational objectives of Signature School. Use of the Internet, school network, and electronic devices is a privilege and not a right. Students utilizing Internet access, school network access, and/or devices must have the permission of the administration. **While on the internet, school network, or on devices, students are to use the same good behavior that is expected of them in the classroom or other areas of the school.**

No Expectation of Privacy. Files stored on and communication and activity occurring on school devices, the school network, and/or school online services are not protected by student privacy rights. In addition, **administrators and faculty retain the right to review communications, messages and files to**

maintain system integrity and to ensure that users are acting lawfully, responsibly, and abiding by this policy. Administrators and faculty will also review messages and files when required to do so by law or to investigate complaints.

The Signature School, its employees and agents, make no warranties or representations of any kind, whether express or implied, concerning the online access and devices it is providing. Furthermore, Signature School will not be responsible for:

1. Any damage suffered by a user, including but not limited to loss of data resulting from delays or interruptions in service, device malfunction, or any form of malicious software.
2. The accuracy, nature, or quality of information stored on the devices, network, and online services provided by Signature School.

To all parents and guardians of students in Signature School:

Signature School is pleased to offer your child access to the Internet. The Internet is a tool for life-long learning. Families should be aware that some material accessible by the Internet may contain items that are illegal, defamatory, inaccurate, sexually explicit, or otherwise potentially offensive. In addition, it is possible that, without your authorization, your child may purchase goods and services by the Internet which could result in expenses for which you would be liable.

While the School's intent is to make Internet access available to your child in order to further educational goals and objectives, your child may find ways to access other prohibited materials as well. Nonetheless, the Signature School believes the benefits to your child from the Internet generally exceeds the disadvantages. The Signature School believes that you as parents and guardians of minors are responsible for setting and conveying the standards that your child should follow when using electronic media and information sources. Please spend time reading and then discussing this Acceptable Use Policy with your child.

Signature School also provides parents and guardians with the option of requesting that their minor child be assigned alternative activities not requiring Internet use.

If your child uses Signature School's Internet, systems, devices, network, and/or online services, you are consenting to this Acceptable Use Policy.
